

Virtualize your Desktop!

Challenge

-  Is your business impacted by the current situation?
-  Is your current access to your systems secure?
-  Is the access to your office systems affected?
-  How do I enable my employees to remotely access the applications they need?
-  Do you need the ability to resume your work from anywhere in the world on your laptop, desktop or tablet?
-  How do I collaborate with my team while working remotely?
-  Are your systems stuck in your office?

We have the solution!

Speridian's solution is built on top of Amazon Web Services (AWS). Secure solutions that helps mobile and remote employees access the applications they need by delivering a cloud desktop accessible anywhere with an internet connection using Windows and Mac computers, Chromebooks, iPads, Fire tablets, Android tablets, or using Chrome or Firefox web browsers.

Allow your team members to access the applications they need on any computer, through a web browser without the hassle of installing applications locally.

Easy to collaborate with others from anywhere, share content, provide rich feedback, and collaboratively edit documents, spreadsheets and presentations.
