

A modernized, intelligent suite of digital banking solutions that fuels growth, delivers quick outcomes and complements business strategies across every sector of the banking industry.

- Public Banks
- Private Banks
- Scheduled Commercial Banks
- Regional Rural Banks
- Credit Unions
- Co-operative Banks
- Non-Banking Financial Companies (NBFC)
- Microfinance Institutions (MFI)

- 
Core Banking Solution
 Provide robust, easy-to-use internal management tools for smoother bank operations and unparalleled client engagement.
- 
Core Lending Solution
 Manage the entire loan lifecycle, from developing and implementing new loan management processes to guaranteeing a seamless digital borrowing experience.
- 
Loan Origination Solution
 Collect, digitize and analyze various data sources for more thorough credit evaluation of potential customers and faster loan processing.
- 
Data Analytics
 Analyze, monitor and improve the overall bank performance using a powerful Analytical Control Engine that derives meaningful business insights for enhanced decision-making.
- 
Delinquency Management Solution
 Complement Default Prediction Models with machine learning to identify risks, initiate early resolution and support loss mitigation
- 
Mobile Banking
 Deploy automated workflows that help banks reduce support costs, expedite processing and improve profitability. And help consumers gain increased mobility while performing a wide variety of banking transactions.
- 
Financial Inclusion Solution
 Act as an intermediary between banks and customers for greater outreach, to increase both loan portfolios and timely collections.

Clientele
