

# Success Story

## Asian Paints

**Region:** India | **Technologies Used :** Angular 10, HTML5, Bootstrap, .NET 5.0, SQL Server, Azure , SharePoint Online, Teams, Yammer, GitHub, Azure DevOps

**Asian Paints** is India's leading paint company with a group turnover of Rs 202.1 billion. The group has a reputation in the corporate world for professionalism, fast track growth, and building shareholder equity. Asian Paints operates in 15 countries and has 26 paint manufacturing facilities in the world servicing consumers in over 60 countries

### Challenge

Asian Paints was looking for a technology partner to build an intranet portal, with a modernized look & feel, responsiveness, user friendliness and with standard features. They wanted to analyze and see the feasibilities of building the portal using latest technology stack and moving it to cloud meeting the expectations. They also wanted the portal to be the go to space for employees to access all needed info and collaborate

### Solution

Speridian proposed and built a unified platform leveraging latest offerings from Microsoft technologies to achieve contemporary features and designs including intelligent and micro services provisions from Azure and O365. The main points include:

- A cost-effective web-based intranet solution which acts as a “one stop solution” for Asian Paints.
- Fully interactive and customizable dynamic dashboard with rich web widgets.
- Social Collaboration platform integration with Yammer, Facebook, LinkedIn, Twitter, Instagram and YouTube.
- Hybrid architecture implementation to leverage the existing on-premise infrastructure in a highly secured environment.
- Implementations of various services like Calendar, Outlook, Surveys, Opinion Polls etc. through O365 API integrations.
- Integrations With 3rd Party Applications like SuccessFactors, 3ISolus, Process Portal and other Internal Portals.

### Results

- Intranet solution deployed on SharePoint Online.
- Effective business communication by leveraging various social collaboration tools
- Modernization and Single Sign On implementation in existing Farm based/Third Party apps
